

2024 BULL SALE

MONDAY 20TH MAY AT 2PM

**GOLD CREEK
SIMMENTALS**

WELCOME TO GOLD CREEK SIMMENTALS

We are delighted to have you at our fifth on-farm bull sale. We have 30 bulls for sale this year – all of which we are extremely proud to present, again showcasing the best traits for high growth, fertility, structure and docility.

2023 has had its fair share of challenges to overcome. A year when all on farm expenses, including bull buying budgets, are scrutinised more than ever – it's become so important to make every dollar count.

You must use all the tools available when selecting your new bull - clearly defining your breeding objectives is critical, and then making sure those objectives line up with your breeder of choice is equally as important. Here at Gold Creek, we endeavour to present you with as much information as possible to assist with this process.

All of our bulls go through a rigorous testing process to be selected in the catalogue, ensuring that everything that can be measured, is measured. This helps to ensure the bulls are true to label and perform exactly how you expect them to when they get home.

The potential gains from hybrid vigour are massive and hard to overlook. It has been well documented (and proven) through trials in the USA of performance gains up to 23%. When most maternal herds could potentially select their replacements from two age groups and use terminal sires over the rest of the herd to take advantage of these gains at no extra cost to the business – this is the biggest free lunch going.

Our methodical progression towards a fully polled herd continues with only one horned bull in this year's line-up and in excess of 25% of the bulls being homozygous polled - meaning all of the progeny will be born polled.

Fertility remains a key focus of the herd, with all heifers successfully calved as 2-year-olds, and they must have a calf every year to remain in the herd. They have one round of fixed time AI and backed up by natural sires, this year achieving 100% conception.

What also gives us confidence that our programme is heading in the right direction is the number of bulls catalogued out of first calving heifers particularly at the top end of the order.

We thank you for reading our catalogue and look forward to working with you.

Tom Sanson

Stud Manager

SALE INFORMATION

HEALTH

HEALTH Gold Creek Simmentals have a C10 TB status, TB has never been detected in the herd. All cattle have been tested negative and vaccinated for bvd. All cattle tested for Mycoplasma bovis.

TRANSPORT

Gold Creek will transport bulls free of charge within 100km or for purchases of 2 or more bulls.

GUARANTEE

All cattle sold come with a two year structure and fertility guarantee. In the rare case a bull is found to be infertile or incapable of natural service, Gold Creek will refund or replace the bull provided the problem is not caused by injury or disease incurred after taking delivery.

TRANSFERS

All cattle are registered with the NZ Simmental Breeders Association and are eligible for transfer.

ACCOMMODATION

Please feel free to contact us if you require assistance with accommodation reservations or transfer from Gisborne to the sale.

5TH ANNUAL AUCTION INFORMATION

Buy online on bidr[®] in 3 easy steps:

Sign up at **bidr.co.nz** and add your agency account under account details.

Browse auctions to find livestock you are interested in buying.

Login and register for the real time online auction to bid for the livestock you wish to purchase.

Why use bidr[®]?

- Free to sign up
- Nationwide reach
- Bid from anywhere
- View auctions and sales results
- Pay for your purchases through your livestock agency account

Our partner agencies:

GOLD CREEK SIMMENTALS SETTING THE STANDARD

WE BREED CATTLE THAT WILL ENHANCE YOUR BOTTOM-LINE.

We have over 200 fully registered pure Simmental cows on the property. We have invested significant time and effort into searching for the right genetic material to enhance our breeding programme here at Gold Creek. We run an extensive Embryo Transfer Programme using the best sourced genetics from across the globe, all sourced via Woonallee Simmentals in Australia. Every year we are flushing our very best cows and introducing a range of genetics to continually lift the quality of calves produced. All registered calves now have 100k SNP profiles and genomically enhanced EBVs.

ENSURING WE ARE DELIVERING WHAT OUR CLIENTS NEED.

We aim to breed predominantly polled cattle. This is something our industry is increasingly moving towards, and something we are seeing our clients demand

more. All bulls have 100k SNP profiles and have been sire verified so you can be sure pedigrees are correct. Incorrect pedigree information can drastically alter a bull's breeding values. All our bulls have also been service capacity tested and semen tested so you can be confident they are ready to go at mating time.

WE FOCUS OUR EYE ON THE END PRODUCT

We place great emphasis on producing faster finishing, high yielding fleshy cattle. We want to put more meat on a smaller frame than traditional Simmentals, which is one of the main reasons for sourcing genetic material from beyond the shores of New Zealand as well. To measure the progress of our breeding programme and to select the best replacements, all cattle between 12 and 15 months are scanned for eye muscle area, p8 fat, rib fat depth and IMF. We also closely monitor carcass yields on cull animals sent for slaughter, with most yielding in excess of 60%.

WHILST ENSURING THE FULL PACKAGE IS TOP QUALITY

Above all, all cattle must be structurally sound, mobile and capable in hill-country. Breeding females are assessed yearly, and all sale bulls are independently assessed by beef class assessor, Bill Austin. Cattle must be docile - there are no exceptions here. In order to ensure this we continually assess for temperament.

INTERNATIONAL GENETIC SOLUTIONS (IGS)

The values in this catalogue were calculated in the International Genetic Solutions evaluation. Each reported trait shows an EBV (estimated breeding value), its accuracy and where it ranks amongst the NZ population. The EBV provides the best current estimate of the bull's true generic merit for that trait, relative to the overall base for the Simmental breed.

INTERNATIONAL GENETIC SOLUTIONS (IGS) EXPLAINED

We know more data means you make more accurate breeding decisions - this is the reason why we have moved to the International Genetic Solutions analysis (IGS).

Putting our bulls alongside 600,000 genotypes from 20 breeds and 22 million different animals gives you access to the largest beef cattle analysis in the world.

IGS significantly scales the comparisons of sires and progeny that you can use to compare our breeding values against. Greater genetic predictions will always help you select the best future genetics for you and your farm. That's what we want for you and why IGS makes complete sense.

MATERNAL

CALVING EASE DIRECT (CE-DIR)

- Reported as the percentage of extra unassisted births in first calving heifers
- CE-DIR is relative to the direct Calving Ease of the animal. Higher values are more favourable

CALVING EASE MATERNAL (CE-MAT)

- Reported as the percentage of extra unassisted births in first calving heifers
- CE-MAT is relative to the Calving Ease of the daughters of the animal. Higher values are more favourable

STAYABILITY (STAY)

- Reported as the differences in percentage of a sire's daughters that are predicted to still be in the herd at 6 years of age (given that they calved at 2 years of age)
- Stability is a measure of reproductive longevity
- Higher values are more favourable

DOCILITY (DOC)

- Reported as the percentage of progeny that will record a score of docile
- Higher values are more favourable

GROWTH

BIRTH WEIGHT (BW)

- Reported in kilos of birth weight
- When selecting bulls to use on heifers, breeders should also focus on the Calving Ease EBV as Birthweight is already used in the Calving Ease EBV calculation

WEANING WEIGHT (WW)

- Reported in kilos of weaning weight of direct progeny
- Higher values are usually more favourable dependant on its relationship with birth weight

YEARLING WEIGHT (YW)

- Reported in kilos of yearling weight of direct progeny
- Higher values are usually more favourable dependant on its relationship with birth weight

MATERNAL WEANING WEIGHT (MWW)

- Reported as kilos of weaning weight of progeny from the animals daughters
- This is a measure of weaning weight differences relative to the combined effects of growth and milk

POST WEANING GAIN (PWG)

- Reported in kilos of weight
- This is a measure of the average daily gain over 160 days from weaning weight (WW) to yearling weight (YW)

MILK

- Reported as kilos of weaning weight of progeny from the animals daughters
- Predicts the difference in maternal production of daughters relative to milk production and mothering
- Values are relative to the environment of the production system. Low input environments should be very conscious of introducing too much milk due to the increased nutrient requirements that it can place on cows

600 DAY WEIGHT (600)

- Reported in kilos of 600 day weight of direct progeny
- Higher values are usually more favourable dependant on its relationship with birth weight

CARCASS

CARCASS WEIGHT (CWT)

- Reported as kilos of carcass weight
- Higher values are usually more favourable, however this is relevant to each producers target market

RIB EYE AREA (REA)

- Reported as square inches of rib eye area relative to the average
- Higher values are usually more favourable

FAT

- Reported as inches of back fat
- Higher values are usually more favourable, however this requires a balance between adequate doing ability in daughters and carcass fat thresholds for target markets

MARBLE SCORE (MARB)

- Reported as the differences in actual carcass marble scores
- This is different to IMF % which is used as an indicator trait in Marble Score. Higher values are more favourable

YIELD GRADE SCORE (YGS)

- Reported as expected differences in progeny average USDA Yield Grade scores
- Yield Grade is used to improve the yield potential of progeny

INTRO TO 2024 LOTS

We take great pride in presenting you with the 2024 Gold Creek Simmental bulls.

Our bulls are bred from outstanding pedigree and we stand behind the performance of our Simmental herd, particularly in the high growth, fertility, structure and docility traits.

We welcome you to take a look at all 30 bulls on offer.

BULL DATA KEY

-  Bulls in top 10% EBV
-  Bulls in top 30% EBV
-  5 for structural traits and 1 for Docility

HOW TO INTERPRET BEEF-CLASS STRUCTURAL ASSESSMENTS

FOR DOCILITY

1 is ideal (docile), 3 is less ideal (restless) and 5 is aggressive (scores of 1 and 2 are preferred).

FOR TRAITS SCORED 1-9

4 and 6 show slight variation from ideal but this includes most animals.

Any animal scoring 4 and 6 would be acceptable in any breeding programme.

3 and 7 shows greater variation and would be acceptable in most commercial breeding programmes, but seed stock producers should be wary.

2 and 8 are low scoring animals and should be looked at closely before purchasing.

1 and 9 should not be catalogued and are considered culls.

Trait	Key	Scoring Range	
Docility	D	① 2 3 4 ⑤	1. Docile 3. Restless 5. Aggressive
Front Feet Claw Set Rear Feet Claw Set	FC RC	 1 2 3 4 5 6 7 8 9	1. Open/Divergent 5. Good 9. Scissor Claw
Front Feet Angle Rear Feet Angle	FA RA	 1 2 3 4 5 6 7 8 9	1. Stubbed Toe 5. Good 9. Shallow Heel
Rear Legs Side View	RS	 1 2 3 4 5 6 7 8 9	1. Straight 5. Good 9. Sickie Hocked
Rear Legs Hind View	RH	 1 2 3 4 5 6 7 8 9	1. Bow Legged 5. Good 9. Cow Hocked
Front Legs Front View	FF	 1 2 3 4 5 6 7 8 9	1. Bow Legged 5. Good 9. Knocked Knee
Udder Evenness	UE	1 2 3 4 5 6 7 8 9	1. Dropped Fore Qtr. 5. Good Balance 9. Dropped Rear Qtr.
Teat Size and Shape	TZ	 1 2 3 4 5 6 7 8 9	1. Very Small/Thin 5. Good 9. Very Large/Bulbous
Sheath & Navel Score	SN	 ① 2 3 4 ⑤	1. Pendulous 3. Good 5. Clean/Tight
Capacity	CP	 ① 2 3 4 ⑤	1. Lacking Capacity 3. Medium 5. Large Volume
Muscle Score	LH	 A B C D E	A. Very Heavy C. Medium E. Light

LOT 01

GOLD CREEK LACHIE LACHSTA

A real curve bender to kick the sale off - easy calving with explosive growth. Structurally very sound, a stud sire prospect. Gold Creek to retain 200 straws for in-herd use.

CONDITIONS OF SALE

1. The sale will be conducted under the usual terms and conditions of the N.Z. Stock and Station Agents Assn. A copy of these terms & conditions will be available in the office on sale day.
2. Every lot will be at the risk of the purchaser from the fall of the hammer.
3. The agents can provide transit and period insurance if required.
4. Buyers are requested to leave the full address and specific delivery instructions with the booking clerk before leaving the sale.
5. This catalogue has been compiled by the vendor. Care has been taken to ensure accuracy but no responsibility is accepted for any error or omission.
6. All lots are sold exclusive of GST.
7. Arrangements must be made with the auctioneer **prior to the sale and settlement made on the buyers' behalf within 14 days.**

HEALTH AND SAFETY

UNDER THE HEALTH AND SAFETY AT WORK ACT 2015 WE ARE REQUIRED TO ADVISE PEOPLE OF POSSIBLE HAZARDS.

1. Cattle Movement.
2. Vehicles and Machinery.
3. Cattle Yards, Slippery Surfaces.
4. Pavilion, Seating.

MANAGING THE NEW INVESTMENT: THE NEW BULL

ONCE THE HAMMER HAS FALLEN AT AUCTION THE BULL IS NOW YOURS! HOW YOU HANDLE HIM FROM HERE WILL HAVE A HUGE BEARING ON WHETHER HE WILL BE A LONG-LASTING MEMBER OF YOUR TEAM OR NOT.

The stressors that you place him under, the level of nutrition that he receives, as well as several other factors can have a strong positive (or negative) effect on the eventual fertility of this animal.

Give your trucking operator clear instructions of what you expect of them. Make sure they know what bulls can be mixed together. If bulls are coming from long distances discuss where they can be rested off the truck etc. Give all the details to the driver, including your name, contact details, delivery address (rapid number and road name), the tag number and brand of your new bull(s) – it is not uncommon for bulls to be delivered to the wrong address!!

When a bull is relocated to a new environment, the bull is subjected to new viral, bacterial and parasite challenges. This is unavoidable. The key way to maintaining a healthy immune system is to ensure these animals have high quality nutrition (which can be a challenge at this time of the year), have had the appropriate animal health treatments (quarantine drench, lice treatment, BVD vaccination etc), and ensure that they establish new social groups quickly. Not adhering to these principles could have long-lasting negative effects on fertility.

When the bull(s) arrive at your farm, let them settle in by leaving them in the yards overnight and observe how they are reacting to their new home. Give them fresh water and good quality hay. If they are fighting you might have to split them, depending on how serious it is. Two bulls fighting is often less of a concern than 3 bulls fighting as sometimes the third bull will broadside one of the bulls locked in battle and serious injury can result.

If you have purchased only one bull, then find a mate or two for him straight away (this could be steers or quiet cows not older sire bulls). If you have bought multiple bulls from a number of different management groups or studs it is often better to put them all together at once. Introducing new bulls into a mob one at a time can lead to the new bull being given a very hard time indeed by his contemporaries.

Whilst the bulls are still new in their environment, take time to “train” them. Make sure they are familiar with the yards and how they work. During this time, you can understand your new bulls and work the bulls that are unsettled. Let them get use to you and how you handle stock – because this will be different to where they have come from.

Lastly and perhaps most importantly, ask the question about Mycoplasma bovis. Where the bulls are coming from are they close to farm that has tested positive for M bovis, do they trade a lot of cattle, do they have neighbours that trade a lot of cattle. For a lot of high country stations, sire bulls are the only animals that are bought on to the property. You need to be weary about purchasing animals that say yes to any of the above questions. It is best to have that uncomfortable discussion now, rather than have

an even more uncomfortable discussion with MPI later.

FMG Premier Bull Sale Insurance

What is FMG Premier Bull Insurance?

FMG provides automatic insurance for all bulls auctioned at an FMG Premier Bull Sale up to the value of \$50,000 for 14 days at no cost to the purchaser. For any bull purchased over \$50,000 talk to an FMG representative.

What is the length of cover?

You will automatically be insured for the specified bull for 14 days. You also have the option to extend the length of insurance to 12 months. Simply tick the “Extend your Premier Bull Insurance” option on the Purchaser Slip. The specified bull is then insured for the remaining period of 12 months at **7.6%** of the purchase price (the sum insured for the bull). If you would like to discuss an alternative timeframe, please have a chat with your local FMG representative.

You don't have to pay today, FMG will invoice you for this additional cover.

What are the benefits?

✓ Infertility	Cover if your specified bull has to be euthanised due to permanent infertility caused by certain accidents, disease, or illness.
✓ Theft or death	We cover your specified bull for theft or death caused by certain accidents, disease, injury, or illness (including while in transit anywhere in New Zealand).
✓ Vet costs	We cover up to \$500 for treatment of your specified bull to prevent death.

What will FMG pay?

FMG will pay the fair market value of your specified bull, less any amount you receive for the sale of the carcass, up to the amount shown on the insurance certificate.

Bull Purchaser Instruction and FMG Insurance Slip

Please complete this slip and hand to the Booking Clerk before leaving the sale. This slip **MUST** be fully completed to be eligible for the 14 days free Premier Bull Insurance.

Purchaser/Agent full name:	If purchasing on behalf of, what is your relationship to owner?	Buyer No:
